

PhonepayPlus needs to consider & address the following issues:

1. Separation by code number & regulation of frivolous "no chance of winning" competitions, chat & sex lines from genuine professional premium rate services.
2. Automatic pre-recorded call charge announcements by network providers at the outset to dispense with call charge announcements by service providers.
3. Loss of value of higher premium rate revenues since inception 10+ years ago by approval of automatic annual or regular rate rises.
